

Cal OES Daily Situation Report

March 15, 2017

Heavy winter rains have created prime conditions for desert wildflowers. In Anza-Borrego Desert State Park, San Diego County, the 'super bloom' can be seen. Evening primrose, desert lily and sand verbena are on full display.

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. Caltrans, CHP and Monterey County Sheriff's Office are on site. Caltrans engineers have been inspecting the bridge on a regular basis.

The Cal OES Coastal Duty Officer (CDO) reported on 03/14/17:

- The demolition process has begun. Equipment difficulties and method of demolition have caused delays
- The southern detour route is open as of 03/13/17 to local traffic only.
 - At this time it is unknown how long this route will continue to be available.
 - There is no estimate as to when it will be open to all traffic.
- There are no plans to place a temporary bridge since it can draw resources away from the replacement and ultimately delay repairs

WEATHER OF CONCERN

Weather of Concern

- A quick moving disturbance will move through Northern California today through Thursday morning bringing light amounts of rain to the region, mainly for the mountains and northern Sacramento valley.

Active Weather Warnings, Watches and Advisories by County:

- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php - Temporarily unavailable. NWS is in the process of repairing the page

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

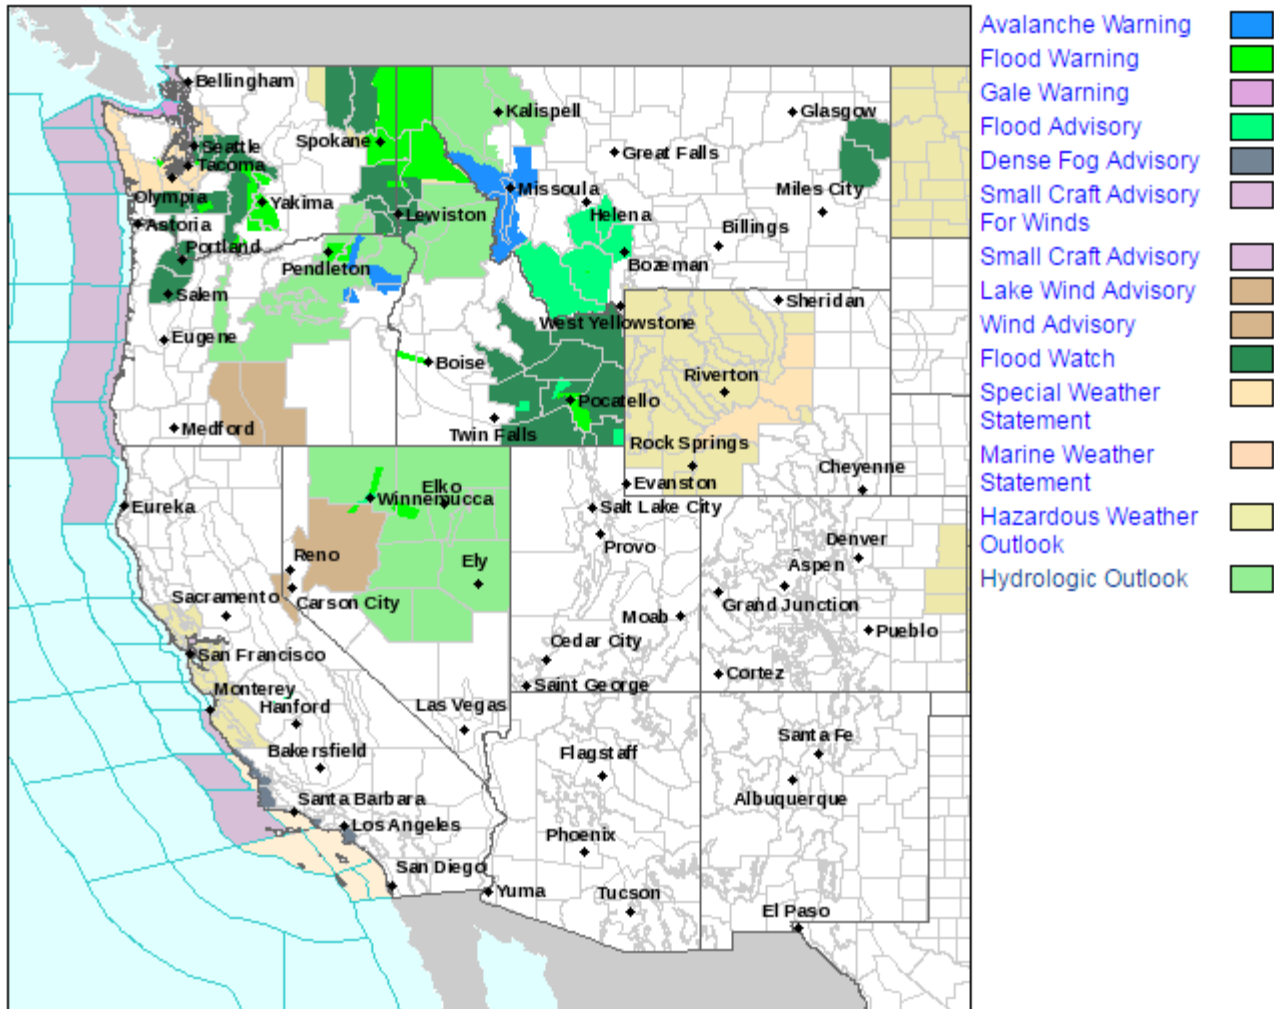

Occasional light rain showers are expected in northwest California today and Friday as weather systems move through the Pacific Northwest. Snow levels will be above 6000 ft. Otherwise, partly cloudy and mild weather will continue throughout Northern California through Friday. On Saturday a weak system will move in and produce gusty S-SW winds to 25-35 mph and rain and mountain snow throughout much of the region. Snow levels will be near 5000 ft in the north and 7000 ft in the south. Occasional light showers with similar snow levels are expected Sunday and Monday. From Tuesday through next Saturday heavier rain and snow can be expected as stronger systems move through the region. SE-SW wind gusts with these systems could reach 40-50 mph in the most wind-prone areas. Rainfall equivalent totals through Monday may be 1-3 inches in the mountains and up to 1 inch elsewhere. Totals from Tuesday through next Saturday are expected to be 4-8 inches in the mountains and 1-4 inches elsewhere.

SOUTHERN CALIFORNIA

The strong ridge of high pressure that has been over the area will weaken today bringing a little cooler temperatures and a little higher humidity. Maximum temperatures will be in the 60s to low 70s across the mountains and upper 70s and 80s in the valleys through Friday. Minimum humidity will be mainly between 15% and 30% through Friday. Southwest to west winds of 15 to 25 mph with gusts to 40 mph will surface across the wind prone mountain and desert areas through Thursday morning. A significant cooling trend and increase in humidity will take place Saturday through the middle next week as a series of Pacific troughs move inland over the West Coast. The first two troughs will be weak and move inland across Northern California and the Pacific Northwest so no rainfall is expected with them this weekend. The troughs will become stronger and dig further south bringing periods of significant rainfall early next week and beyond. Winds will be westerly 15 to 25 mph with gusts to 40 mph Saturday afternoon through Sunday evening across the mountain ridges and desert passes and then become southerly 20 to 30 mph with gusts to 50 mph early next week.
